Education

Bachelor of Applied Science
Computer Engineering
University of British Columbia
(Expected Graduation: May 2020)

Technical Skills

- Java, C#, C++
- JavaScript, HTML, CSS, Node.js
- Jest, Travis CI
- Git, JIRA, Bitbucket, Slack

Summary

UBC Computer Engineering fourth year student with **1.5+ years** of relevant software life cycle work experience - including **software development, testing**, and **implementation**. Looking to share my skillset and experience in a **Software Engineer/Developer** role and contribute to your company's success.

Work Experience

Implementation Developer
Aimsio (Vancouver, BC) May 2019 - Aug 2019

- Developed custom **JavaScript** code and accompanying unit tests for client requested features and change orders as part of the Implementation team
- Designed unique print-ready **HTML**, **CSS**, and **JavaScript** files within the constraints of the product
- Managed client on-boarding by regularly meeting and discussing features, efficiently creating those features, presenting them to the client for feedback, and repeating the process until the client's needs are fully realized, to ensure the desired product was produced efficiently

Junior Implementation Developer
Aimsio (Vancouver, BC) May 2018 - Aug 2018

- Developed custom **JavaScript** code and accompanying unit tests to extend functionalities for clients
- Designed unique print-ready **HTML**, **CSS**, and **JavaScript** files within the constraints of the product
- Researched and prototyped development workflow improvements, including a drag-and-drop **HTML** and **CSS** editor and a **JavaScript** snapshot generator

Software Developer / Quality Assurance Tester Co-op
PerfectMind (Burnaby, BC) May 2017 - Dec 2017

- Developed features and bug fixes on an MVC web application comprising of **C#**, **JavaScript**, **HTML**, **CSS**, and **SQL** components
- Achieved data reconciliation and analysis for general ledger reports
- Ensured the quality and stability of the product through defect verification and validation

Technical Projects

UBSafe - Mobile App (Course Project, 1st Place) Dec 2018

- Campus safety app with peer location-monitoring and alert system
- Start/Join virtual safewalk sessions which allow users to monitor their friend's location to ensure safe arrival at their destination
- Presented to a panel of judges and received first place out of over 30 competing teams
- Frontend: **React Native, JavaScript**
- Backend: **Google Maps, Google Firebase, Facebook Authentication**
- Testing: **Jest, Travis CI**

PDF to HTML Converter (Personal Project) Apr 2018

- Developed a parser using **Node.js** that takes any PDF as input, converts it into **JSON**, and then transforms that into **HTML** so that the original PDF layout is preserved
