Bachelor of Applied Science
Computer Engineering
Co-operative Education Program
University of British Columbia
Sept 2015 - May 2020

Technical Skills

- C++, C#, Java
- JavaScript, HTML, CSS, Node.js
- Jest, Travis CI
- Git, JIRA, Confluence, Slack

Summary

Hi! My name is Marshall and I've always had a passion for gaming. I have a degree in Computer Engineering and experience working as a software developer. I value a workplace with a positive culture and opportunities to learn and grow.

Work Experience

Development Support
Electronic Arts (Burnaby, BC) May 2020 - Present

- Supported Technical Artists with the development and verification of the Frostbite game engine, used to create and publish FIFA 21
- Led the automation of test suites for the Frostbite Engine software
- Provided asset testing for kits, stadiums, and scenes, including bug discovery, verification, validation, and regression

Implementation Developer
Aimsio (Vancouver, BC) May 2019 - Aug 2019

- Developed dynamic data sheets using JavaScript, and created accompanying JavaScript unit tests
- Managed client onboarding by regularly meeting, developing features, presenting them to the client for feedback, and repeating the process until the client's needs are fully realized

Junior Implementation Developer
Aimsio (Vancouver, BC) May 2018 - Aug 2018

- Designed unique print-ready HTML, CSS, and JavaScript
- Researched and prototyped development workflow improvements, including a drag-and-drop HTML and CSS editor and a JavaScript snapshot generator

Software Developer / Quality Assurance Tester
PerfectMind (Burnaby, BC) May 2017 - Dec 2017

- Developed features and bug fixes on an MVC web application comprising of C#, JavaScript, HTML, CSS, and SQL components
- Achieved data reconciliation and analysis for general ledger reports
- Ensured the quality and stability of the product through defect verification and validation

AV Installation Technician
PJS Systems (New Westminster, BC) April 2016 - Aug 2016

- Installed audio and visual systems, including digital displays, full room control units, and public announcement systems.

Technical Projects

Athlete's Aid (Capstone Project) Sept 2019 – April 2020

- Injury tracking application for UBC Athletics. Allows physical trainers to input athlete injuries and training recommendations, and for coaches to view this data to ensure rehabilitation
- Led the design and testing for the project, implementing a Jest snapshot test suite

UBSafe (Course Competition Project, 1st Place) Sept 2018 - Dec 2018

- Campus safety app with peer location-monitoring and alert system
- Start/Join virtual safe-walk sessions which allow users to monitor their friend's location to ensure safe arrival at their destination
- Received first place out of 30 competing teams
